Six Monthly Compliance Report of Environmental Clearance

DHANKASA UNDERGROUND MINE

[1.20 MTPA in Area of 582.651 HA] EC No.: J-11015/451/2008-IA.II(M), Date-19.12.2019

Western Coalfields Limited
Pench Area
Po: Parasia, Chhindwara (MP)- 480441

PERIOD: 01.04.2022 to 30.09.2022

EC Compliance Report - EC letter vide letter No. J-11015/451/2008-IA.II (M) dated 19.12.2019 for production capacity 1 MTPA (Normative) / 1.20 MTPA (Peak)

Sl.	CONDITION	COMPLIANCE
1.	Production plan/scheduled as mentioned in the	Noted.
	approved Mining Plan shall be adhered to.	
2.	The project proponent shall obtain Consent	CTE obtained from MPPCB vide CTE-
	to establish from the State Pollution Central	51440 dt. 17.04.2020
	Board for capacity of 1.20 MTPA prior to	
	commencement of the increased production.	
3.	Transportation of coal from face to coal heap	Noted.
	shall be carried out by belt conveyor. Further,	
	the coal transportation from coal heap to Coal	
	Handling Plant shall be carried out through	
	covered trucks.	
4.	Mitigating measures to be undertaken to	A tractor mounted mobile water
	control dust and other fugitive emissions all	spraying system will be deployed once
	along the roads by providing sufficient numbers	the mining operations starts.
5.	of water sprinklers.	Noted will be done so nor the arranged
3.	Sufficient coal pillars shall be left un-extracted around the air shaft (within the subsidence	Noted, will be done as per the approved mining plan.
	influence area) to protect from any damage	mining plan.
	from subsidence, if any.	
6.	Solid barrier shall be left below the roads	Noted, will be done as per the approved
J.	falling within the block to avoid any damage	mining plan.
	to the roads and no depillaring operation shall	anning panni
	be carried out below the township/colony.	
7.	Depression due to subsidence resulting in water	Necessary actions will be taken, to
	accumulating within the low lying areas shall be	avoid accumulation of water in low
	filled up or drained out by cutting drains.	lying area.
8.	Regular monitoring of subsidence movement on	Noted, Regular monitoring of
	the surface over and around the working area	subsidence will be done as per DGMS
	and impact on natural drainage pattern, water	regulations and circulars.
	bodies, vegetation, structure, roads and	
	surroundings should be continued till	
	movement cases completely. In case of	
	observation of any high rate of subsidence	
	movement, appropriate effective corrective measures should be taken to avoid loss of life	
	and materials. Cracks should be effectively	
	plugged with ballast and clay soil/suitable	
	materials.	
9.	Garland Surface drains (Size, gradient and	Noted.
	length) around the safety areas such as mine	
	shaft and low lying areas and sump capacity	
	should be designed keeping 50% safety	
	margin over and above the peak sudden rain	
	fall and maximum discharge in the area	
	adjoining the mine sites. Sump capacity	
	should also provide adequate retention period	
	to allow proper settling of silt material.	
	Sufficient number of pumps of adequate	
	capacity shall be deployed to pump out mine	
10	water during peak rain fall.	Note d
10.	Sufficient number of pumps of adequate	Noted.

	capacity shall be deployed to pump out mine water during peak rain fall.	
11.	The company shall obtain approval of CGWA for use of groundwater for mining operations at its enhanced capacity of 1.20 MTPA.	CGWA NOC has been obtained vide: CGWA/NOC/MIN/ORIG/2021/13949 and valid upto 02.12.2023.
12.	Continuous monitoring of occupational safety and other health hazards, and the corrective actions need to be ensured.	Noted.
13.	A third-party assessment of EC compliance shall be undertaken once in three years through agency like ICFRI /NEERI/IIT or any other expert agency identified by the Ministry.	Noted.
14.	PP shall comply all the proposed mitigation measures submitted to Ministry vide Reference No. WCL/Headquarter/Environment/8-D&16-C/1606-1608 dated 20th November, 2019	Noted.
<u>a)</u>	Statutory Compliance	
1.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.	vide F.No. 8-45/2017-FC dt. 02.01.2018
2.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.	Not applicable
3.	The project proponent shall prepare a Site-Specific Conservation Plan / Wildlife Management Plan and approved by the Chief Wildlife Warden. The recommendations of the approved Site-Specific Conservation Plan / Wildlife Management Plan shall be implemented in consultation with the State Forest Department. The implementation report shall be furnished along with the six-monthly compliance report (in case of the presence of schedule-I species in the study area).	Noted. PP will consult the state forest department to verify the presence of any Schedule-1 species.
4.	The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act,1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the concerned State pollution Control Board/ Committee.	CTE obtained from MPPCB vide CTE-51440 dt. 17.04.2020
5.	The project proponent shall obtain the necessary permission from the Central Ground Water Authority.	CGWA NOC has been obtained vide: CGWA/NOC/MIN/ORIG/2021/13949 and valid upto 02.12.2023.
6.	Solid/hazardous waste generated in the mines needs to addressed in accordance to the Solid Waste Management Rules, 2016/Hazardous. & Other Waste Management Rules, 2016.	Noted.
b)	Air quality monitoring and preservation	
1.	Continuous ambient air quality Continuous	Noted.

	core zone as well as in the buffer zone for monitoring of pollutants, namely PM10, PM2.5, SO2 and NOx. Location of the stations shall be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets in consultation with the State Pollution Control Board. Online ambient air quality monitoring stations may also be installed in addition to the regular monitoring stations as per the requirement and/or in consultation with the SPCB. Monitoring of heavy metals such as Hg, As, Ni, Cd, Cr; etc to be carried out at least once in six months.	
2.	The Ambient Air Quality monitoring in the core zone shall be carried out to ensure the Coal Industry Standards notified vide GSR742(E) dated 25 th September, 2000 and as amended from time to time by the Central Pollution Control Board. Data on ambient air quality and heavy metals such as Hg, As, Ni, Cd, Cr, etc and other monitoring data shall be regularly reported to the Ministry/Regional Office and to the CPCB/SPCB.	Noted.
3.	Transportation of coal, to the extent permitted by road, shall be 'carried out by covered trucks/conveyors. Effective control measures such as: regular water/mist sprinkling/rain gun etc Shall be carried out in critical areas prone to air pollution (with higher values of PM10/PM2.5) such as haul road, loading/unloading and transfer points. Fugitive dust emissions from all sources shall controlled regularly. It shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central/State Pollution Control Board.	Noted.
4.	The transportation of coal shall be carried out as per the provisions and route envisaged in the approved Mining Plan or environment monitoring plan. Transportation of the coal through the existing road passing through any village shall be avoided. In case, it is proposed to construct a 'bypass' road, it should be so constructed so that the impact of sound, dust and accidents could be appropriately mitigated.	Noted.
5.	Vehicular emissions shall be kept under control and regularly monitored. All the vehicles engaged in mining and allied activities shall operate only after obtaining PUC' certificate from the authorized pollution testing centers.	Noted.
6.	Coal stock pile/crusher/feeder and breaker material transfer points shall invariably be	Water spraying arrangements will be installed before onset of coal

	11 1 14 1 4 1 1 4 D 14	1
	provided with dust suppression system. Belt-	production.
	conveyors shall be fully covered to avoid air	
	borne dust. Side cladding all along the	
	conveyor gantry should be made to avoid air	
	borne dust. Drills shall be wet operated or	
	fitted with dust extractors.	
7.	Coal handling plant shall be operated with	Not applicable, No CHP within the
	effective control measures w.r.t. various	mine premises.
	environmental parameters. Environmental	inine premises.
	friendly sustainable technology should be	
	•	
a)	implemented for mitigating such parameters.	
C)	Water quality monitoring and preservation	
1.	The effluent discharge (mine waste water,	Noted.
	workshop effluent) shall be monitored in terms	
	of the parameters notified under the Water	
	Act, 1974 Coal Industry Standards vide GSR	
	742 (E) dated 25th September, 2000 and as	
	amended from time to time by the Central	
	Pollution Control Board.	
2.	The monitoring data shall be uploaded on the	Noted.
۷.		TYOICU.
	company's website and displayed at the	
	project site at a suitable location. The	
	circular No. J-20012/1/2006-IA.11 (M) dated	
	27th May, 2009 issued by Ministry of	
	Environment, Forest and Climate Change	
	shall also be referred in this regard for its	
	compliance.	
3.	Regular monitoring of ground water level and	Noted.
	quality shall be carried out in and around the	
	mine lease area by establishing a network of	
	existing wells and constructing new	
	piezometers during the mining operations. The	
	monitoring of ground water levels shall be	
	carried out four times a year i.e. pre-monsoon,	
	monsoon, post-monsoon and winter. The	
	ground water quality shall be monitored once a	
	year, and the data thus collected shall be sent	
	regularly to MOEFCC/RO.	
4.	Monitoring of water quality upstream and	Noted.
	downstream of water bodies shall be carried	
	out once in six months and record of	
	monitoring data shall be maintained and	
	submitted to the Ministry of Environment,	
	Forest and Climate Change/Regional Office.	
5.	Ground water, excluding mine water, shall	Noted.
J.	not be used for mining Operations.	2.000
	Rainwater harvesting shall be implemented	
	for conservation and augmentation of ground	
	water resources.	N. 1. 1. 1.
6.	Catch and/or garland drains and siltation	Not applicable, as it is an underground
	ponds in adequate numbers and appropriate	mining project.
	size shall be constructed around the mine	
	working, coal heaps & OB dumps to prevent	
	run off of water and flow of sediments	
		1
	directly into the river and water bodies.	
	directly into the river and water bodies. Further, dump material shall be properly	

	consolidated/ compacted and accumulation	
	of water over dumps shall be avoided by	
	providing adequate channels for flow of silt	
	into the drains. The drains/ ponds so	
	constructed shall be regularly de-silted	
	particularly before onset of monsoon and	
	maintained properly. Sump capacity should	
	provide adequate retention period to allow	
	proper settling of silt material. The water so	
	collected in the sump shall be utilised for	
	dust suppression and green belt development	
	and other industrial use. Dimension of the	
	retaining wall constructed, if any, at the toe	
	of the OB dumps within the mine to check	
	run-off and siltation should be based on the	
	rainfall data. The plantation of native	
	species to be made between toe of the dump	
	and adjacent field/habitation/water bodies.	
7.	Adequate groundwater recharge	Noted.
	measures shall be taken up for	
	augmentation of ground water. The project	
	authorities shall meet water requirement of	
	nearby village(s) after due treatment	
	conforming to the specific requirement	
	(standards).	
8.	Industrial waste water generated from CHP,	Not applicable, as there is no CHP or
	workshop and other waste water, shall be	workshop in the mine premises.
	properly collected and treated so as to	
	conform to the standards prescribed under the	
	standards prescribed under Water Act 1974 and	
	Environment (Protection) Act, 1986 and the	
	Rules made there under, and as amended	
	from time to time. Adequate ETP /STP needs to	
	be provided.	
9.	The water pumped out from the mine, after	Noted.
	siltation, shall be utilized for industrial	
	purpose viz. watering the mine area, roads,	
	green belt development etc. The drains shall	
	be regularly desilted particularly after	
	monsoon and maintained properly.	
10.	The surface drainage plan including surface	Noted.
10.	water conservation plan for the area of	TYOICU.
	_	
	j	
	operations, considering the presence of	
	river/rivulet/pond/lake etc, shall be prepared	
	and implemented by the project proponent.	
	The surface drainage plan and/or any diversion	
	of natural water courses shall be as per the	
	approved Mining Plan/EIA/EMP report and	
	with due approval of the concerned State/GoI	
	Authority. The construction of embankment to	
	prevent any danger against inrush of surface	
	water into the mine should be as per the	
	approved Mining Plan and as per the	
	permission of DGMS or any other authority as	
	prescribed by the law.	

		T
11.	The project proponent shall take all	Noted.
	precautionary measures to ensure	
	riverine/riparian ecosystem in and around	
	the coal mine up to a distance of 5 km. A	
	riverine/riparian ecosystem conservation	
	and management plan should be prepared	
	and implemented in consultation with the	
	irrigation / water resource department in the	
	state government.	
(d)	Noise and Vibration monitoring and	
(u)	prevention	
1.	Adequate measures shall be taken for	Workers will be provided with ear
	Adequate measures shall be taken for control	muffs and other safety equipments.
	of noise levels as per Noise Pollution Rules,	maris and other sarety equipments.
	2016 in the work environment. Workers	
	engaged in blasting and drilling operations,	
	operation of HEMM, etc. shall be provided	
	· · · · · · · · · · · · · · · · · · ·	
	with personal protective equipments (PPE)	
	like ear plugs/muffs in conformity with the	
	prescribed norms and guidelines in this	
	regard. Adequate awareness programme for	
	users to be conducted. Progress in usage of	
	such accessories to be monitored.	
2.	Controlled blasting techniques shall be	Blasting will be done as per the DGMS
	practiced in order to mitigate ground	guidelines.
	vibrations, fly rocks, noise and air blast etc., as	
	per the guidelines prescribed by the DGMS.	
3.	The noise level survey shall be carried out as	Noted.
	per the prescribed guidelines to assess noise	
	exposure of the workmen at vulnerable points	
	in the mine premises, and report in this regard	
	shall be submitted to the Ministry/R0 on six-	
	monthly basis.	
(e)	Mining Plan	
1.	Mining shall be carried out under strict	Noted.
1.	adherence to provisions of the Mines Act 1952	110104.
	and subordinate legislations made there-under	
	as applicable.	
2.		Noted.
۷.	Mining shall be carried out as per the approved	INOICU.
	mining plan (including Mine Closure Plan)	
	abiding by mining laws related to coal	
	mining and the relevant circulars issued by	
	Directorate General Mines Safety (DGMS).	N 1
3.	No mining shall be carried out in forest land	Noted.
	without obtaining Forestry Clearance as per	
	Forest (Conservation) Act, 1980.	
4.	Efforts should be made to reduce energy and	Noted.
4.	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency	Noted.
4.	Efforts should be made to reduce energy and	Noted.
4. (f)	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency	Noted.
	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. Land reclamation	Noted. Noted.
(f)	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. Land reclamation Digital Survey of entire lease hold area/core	
(f)	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. Land reclamation Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey	
(f)	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. Land reclamation Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey shall be carried out at least once in three	
(f)	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. Land reclamation Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey shall be carried out at least once in three years for monitoring land use pattern and	
(f)	Efforts should be made to reduce energy and fuel consumption by conservation, efficiency improvements and use of renewable energy. Land reclamation Digital Survey of entire lease hold area/core zone using Satellite Remote Sensing survey shall be carried out at least once in three	

	Change (MOEFCC) from time to time shall	
	be submitted to MOEFCC/Regional Office	
	(RO).	
2.	The final mine void depth should preferably be as per the approved Mine Closure Plan, and in case it exceeds 40 m, adequate	Not applicable, as it is an underground mining project.
	engineering interventions shall be provided for sustenance of aquatic life therein. The	
	remaining area shall be backfilled and covered with thick and alive top soil. Post-	
	mining land be rendered usable for agricultural/forestry purposes and shall be	
	diverted. Further action will be treated as specified in the guidelines for Preparation of	
	Mine Closure Plan issued by the Ministry of Coal dated 27th August, 2009 and subsequent	
	amendments.	
3.	The entire excavated area, backfilling, external OB dumping (including top soil) and	Not applicable, as it is an underground mining project.
	afforestation plan shall be in conformity with the "during mining "/" post mining" land-use	
	pattern, which is an integral part of the approved Mining Plan and the EIA/EMP submitted to this Ministry. Progressive	
	compliance status vis-a- vis the post mining land use pattern shall be	
4.	submitted to the MOEFCC/RO. Fly ash shall be used for external dump of	Not applicable, as it is an underground
7.	overburden, backfilling or stowing of mine as per provisions contained in clause (i) and (ii) of subparagraph (8) of fly ash notification issued	mining project.
	vide SO 2804 (E) dated 3rd November, 2009 as amended from time to time. Efforts shall be made to utilize gypsum generated from Flue	
	Gas Desulfurization (FGD), if any, along with fly ash for external dump of overburden,	
	backfilling of mines. Compliance report shall be submitted to Regional Office of MoEF&CC,	
	CPCB and. SPCB.	
5.	Further, it may be ensured that as per the	Not applicable, as it is an underground
	time schedule specified in mine closure plan it should remain live till the point of	mining project.
	utilization. The topsoil shall temporarily be	
	stored at earmarked site(s) only and shall not be kept unutilized. The top soil shall be used	
	for land reclamation and plantation purposes.	
	Active OB dumps shall be stabilised with	
	native grass species to prevent erosion and surface run off. The other overburden dumps	
	shall be vegetated with native flora species. The excavated area shall be backfilled and	
	afforested in line with the approved Mine	
	Closure Plan. Monitoring and management of rehabilitated areas shall continue until the	
	vegetation becomes self-sustaining.	
	Compliance status shall be submitted to the	<u> </u>

		I
	Ministry of Environment, Forest and Climate Change/ Regional Office.	
-	<u> </u>	Not applicable as it is an underground
6.	The project proponent shall make necessary	Not applicable, as it is an underground
	alternative arrangements, if grazing land is	mining project.
	involved in core zone, in consultation with	
	the State government to provide alternate	
	areas for livestock grazing, if any. In this	
	context, the project proponent shall	
	implement the directions of Hon'bie	
	Supreme Court with regard to acquiring	
	grazing land.	
(g)	Green Belt	
1.	The project proponent shall take all	Noted.
	precautionary measures during mining	
	operation for conservation and protection of	
	endangered/endemic flora/fauna, if any,	
	spotted/reported in the study area. The Action	
	plan in this. regard, if any, shall be prepared	
	and implemented in consultation with the State	
	Forest and Wildlife Department.	
2.	Greenbelt consisting of 3-tier plantation of	Noted.
۷.		Noted.
	width not less than 7.5 m shall be developed	
	all along the mine lease area as soon as	
	possible. The green belt comprising a mix of	
	native species (endemic species should be	
	given priority) shall be developed all along the	
	major approach/ coal transportation roads.	
(h)	Public hearing and Human health issues	
1.	Adequate illumination shall be ensured in all	Noted.
	mine location's (as per DGMS standards)	
	and monitored weekly. The report on the same	
	shall be submitted to this ministry & it's RO on	
	six-monthly basis.	
2.	The project proponent shall undertake	It is a company policy to conduct
2.	occupational health survey for initial and	periodic medical examination of all its
	·	_
	periodical medical examination of the personnel	employees. For person age less than 45
	engaged in-the project and maintain records	years, PME done once in every five
	accordingly as per the provisions of the Mines	years and for person age above 45
	Rules, 1955 and DGMS circulars. Besides	years, PME done once in every three
	regular periodic health check-up, 20% of the	years.
	personnel identified from workforce engaged in	
	active mining operations shall be subjected to	
	health check-up for occupational diseases and	
	hearing impairment, if any, as amended time to	
	time.	
3.	Personnel (including outsourced employees)	Noted.
-	working in core zone shall wear protective	
	respiratory devices and shall also be provided	
	with adequate training and information on	
	safety and health aspects.	
4.	Implementation of the action plan on the	Noted.
4.	•	Noted.
	issues raised during the public hearing shall	
	be ensured. The project proponent shall	
	undertake all the tasks/measures as per the	
	action plan submitted with budgetary	
	provisions during the public hearing. Land	

1	oustees shall be compensated as per thenorms laid down in the R&R policy of the	
(_ ·	
		1
۱ (company/State Government/Central	
	Government, as applicable.	
	The project proponent shall follow the	Noted.
	mitigation measures provided in this Ministry's	
	OM No. Z-11013/5712014-IA. II (M) dated	
	29th October, 2014,	
	titled' Impact of Mining activities oh	
	habitations-issues related to the mining	
	projects wherein habitations and villages are	
1	the part of mine lease areas or habitations and	
	villages are surrounded by the mine lease	
	area'.	
(i) (Corporate Environment Responsibility	
1. '	The project proponent shall comply with the	Noted.
]	provisions contained in this Ministry's OM	
	vide F.No.22-65/2017-IA.III dated 1st May	
	2018, as applicable, regarding Corporate	
	Environment Responsibility.	
	The company shall have a well laid down	Company do have a Environment
	environmental policy duly approve by the	Policy, uploaded on company website.
]	Board of Directors. The environmental policy	There is proper check & balance system
:	should prescribe for standard operating	established in the company. Non-
	procedures to have proper checks and balances	compliance/ violations related to
	and to bring into focus any infringements /	environment is reported to the General
(deviation / violation of the environmental/	Manager (Env) of the company who in

	qualified personnel shall be set up under the	organization. GM (Env) is assisted by a
	control of senior Executive, who will directly to	team of multi-disciplinary engineers. At
1	the head of the organization.	area the department is headed by Area
		Nodal Officer (Env) who is assisted by
		Civil department. At mine level,
		surveyor is the nodal officer of
		Environment Department.
	Action plan for implementing EMP and	There is a separate fund for the
	environmental conditions along with	environment works.
	responsibility matrix of the company shall be	
	prepared and shall be duly approved by	
	competent authority. The year wise funds	
	earmarked for environmental protection	
	measures shall be kept in separate account and	
	not to be diverted for any other purpose. Year	
	wise progress of implementation of action plan	
	shall be reported to the Ministry/Regional	
	Office along with the Six-Monthly Compliance	
	Report.	
5.	Self-environmental audit shall be conducted	Noted.
		İ
;	annually. Every three years third party environmental audit shall be carried out.	

(j)	Miscellaneous	
1.	The project proponent shall make public the	Complied.
	environmental clearance granted for their	•
	project along with the environmental	
	conditions and safeguards at their cost by	
	prominently advertising it at least in two local	
	newspapers of the District or State, of which	
	one shall be in the vernacular language within	
	seven days and in addition this shall also be	
	displayed in the project proponent's website	
	permanently.	
2.	The copies of the environmental clearance	Complied.
	shall be submitted by the project proponents to	•
	the Heads of local bodies, Panchayats and	
	Municipal Bodies in addition to the relevant	
	offices of the Government who in turn has to	
	display the same for 30 days from the date of	
	receipt.	
3.	The project proponent shall upload the	Noted.
	status of compliance of the stipulated	
	environment clearance conditions, including	
	results of monitored data on their website	
	and update the same on half-yearly basis.	
4.	The project proponent shall monitor the	Noted.
	criteria pollutants level namely; PM10, S02,	
	NOx (ambient levels) or critical sectoral	
	parameters, indicated for the projects and	
	display the same at a convenient location for	
	disclosure to the public and put on the website	
	of the company.	
5.	The project proponent shall submit six-	Noted.
	monthly reports on the status of the	
	compliance of the stipulated environmental	
	conditions on the website of the ministry of	
	Environment, Forest and Climate Change at	
	environment clearance portal.	
6.	The project proponent shall follow the	Noted.
	mitigation measures provided in this Ministry's	
	OM No. Z-11013/5712014-1A.11(M) dated	
	29th October, 2014, titled 'Impact of mining	
	activities on habitations-issues related to the	
	mining projects wherein habitations and	
	villages are the part of mine lease areas or	
	habitations and villages are surrounded by the	
	mine lease area.	
7.	The project proponent shall submit the	Noted.
	environmental statement for each financial	
	year in Form-V to the concerned State	
	Pollution Control Board as prescribed under	
	the Environment (Protection) Rules, 1986, as	
	amended subsequently and put on the website	
	of the company.	
8.	The project authorities shall inform to the	Noted.
8.		Noted.
8.	The project authorities shall inform to the	Noted.

	the stipulations made by the State Pollution Control Board and the State Government.	
10.	The project proponent shall abide by	Noted.
	all the commitments and	
	recommendations made in the EIA/EMP	
	report, commitment made during Public	
	Hearing and also that during their	
	presentation to the Expert Appraisal	
	Committee.	
11.	No further expansion or modifications in	Noted.
	the plant shall be carried out without prior	
	approval of the Ministry of Environment,	
	Forests and Climate Change.	
12.	Concealing factual data or submission of	Noted.
