CIRCULAR

During investigation of a complaint related to storage of diesel and deployment of diesel dispensing tanker for filling of diesel in equipment by Vigilance Department, it has been observed that the diesel dispensing vehicles deployed by HOE contractor for diesel filling of equipment were without valid licence issued by PESO under the provisions of the Petroleum Rules, 1976. This has been viewed seriously.

It is, therefore, directed that any diesel dispensing vehicle deployed by HOE contractor against work order must have valid licence for transportation of petroleum on land by mechanically propelled vehicles. Further, if the HOE contractor intends to store HSD, then it shall comply with all the relevant provision of the Act/Rule. The Area Authority/Engineer-in-charge shall ensure and monitor its compliance.

This will come into force with immediate effect

Director (Tech) P&P
