CIRCULAR

During the investigation of a file relating to procurement of some of the spares of Retrofit Kit of LHD, it has been observed that the Areas have been purchasing through tender route from proven sources on need based on the plea that these spares were not covered in the RC, whereas the sub-assembly of Retrofit Kit in composite was covered in the RC. Had these spares been included in the RC, quality repair of LHDs would have been ensured in time.

It is, therefore, directed that while concluding RC for the assemblies / sub assemblies of HEMM / other Plant & Machineries, the consumption pattern of the spares of these sub-assemblies / sub-assemblies may also be reviewed and the same be included in the RC.
