Sub : Preventive Vigilance

It was observed while processing two specific cases relating to miscellaneous works in UG Mines that for a work of removal of stones, fallen coal etc. on roadways, rail, tracks and packing the lines with the ashes etc., Group-IV wages were taken whereas these jobs could have been performed by General Mazdoor Category-I. This resulted in inflated estimate being prepared with labour wages for higher category. However, Category-I wage was paid by contractor in the presence of Officer authorized by the Management. This increased the profit margin of the contractor which amounts to favouring him. It is advised that henceforth proper care should be taken regarding the basis of component reflected in the estimate which should be specified in the work order and should not be deviated during execution stage. The estimate so prepared, taking into components of wages, the person concerned who has been authorized to supervise the payment be made known the basis of estimate taken into consideration and the work awarded to ensure correct payment to contractor labours.
